DATA VERIFICATION NOTES

- Close levels for Sensex and Nifty are confirmed across HDFC Sky, Business Standard and 5paisa. India VIX: n/a (not stated in any source). Bank Nifty +1.18% is single-source.
- The circuit list is the HDFC Sky 'top 5 per side' page (3:30 PM) plus the multibagg.ai small-cap gainers list; it is NOT an exhaustive list of all circuit hitters (5paisa counts 140 upper / 69 lower market-wide). Full NSE/BSE circuit lists could not be retrieved.
- Only Equitas SFB (20% band) is confirmed at -19.99%, i.e. effectively at its lower-circuit limit. For other names the source page warns that appearing on a list does not mean the stock is locked at close; locks are described as 'at or near' band.
- No confirmed lower-circuit lock was found among large-cap stocks; the lower-band names are small/mid-cap. Tribhovandas Bhimji Zaveri was listed as a lower-band hitter at only -0.60% (Rs.637.50) and is excluded as not near its band.
- Source discrepancies: Adani Ports (Rs.1,872/+6.29% vs Rs.1,850/+5.17%), Adani Enterprises, DCM Shriram (Rs.63.20 vs Rs.63.55), Nilkamal and ESDS internal figures, and breadth counts (2,443/1,615 vs 2,196/1,387). Table values from the HDFC Sky table are used for circuit rows.
- Catalysts marked 'unverified' were not found in any source; no catalyst has been inferred. 52-week high/low and volume-vs-average multiples by name: n/a (only DCM Shriram's 52-week high found; volumes shown are absolute, not versus average).
- Judgment call (unattended run): run started late (about 21:25 IST); stocks with conflicting data are shown with the primary source's figures and flagged. Hedged recommendations only.
